Sur le corps vs sur le vêtement

DEUX FAÇONS DE MESURER

CORPS

Mesure prise sur le corps : le ruban est ajusté sans serrer, en laissant passer un doigt.

VÊTEMENT

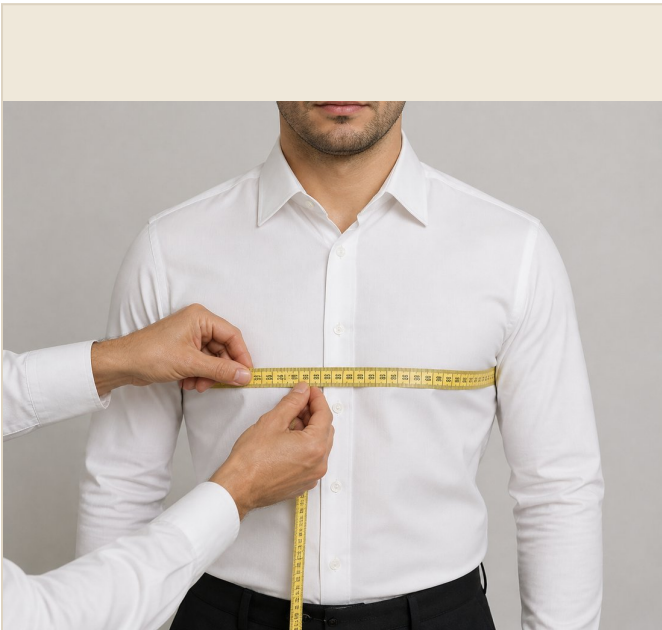

Le vêtement est posé parfaitement à plat ; mesurez aux positions indiquées. Doublez les largeurs à plat pour les tours.

Indiquez toujours si la valeur est prise sur le corps ou sur le vêtement — l'atelier en déduit l'aisance. Chaque mesure montre côte à côte la méthode corps et la méthode vêtement ; une seule image signifie que la mesure ne s'utilise que d'un côté.
